Corex Partners with Recycling Company Paper Resource

SYDNEY, 15 March 2023 – Corex Group has formed a partnership with New South Wales Recycling business Paper Resource, creating a streamlined solution for recycling Corflute® in NSW.

Corex Group (Corex) which includes [Corex Plastics](#), [Corex Recycling](#) and [Megara Australia](#) will be working with fellow Australian privately owned company [Paper Resource](#) to offer our NSW customers with a solution that ensures that all Corflute® products can be returned for recycling and reuse in products for tomorrow.

Background

Over the last few years, bringing Corflute® back to Victoria for recycling became very difficult. The costs associated with freight, coupled with business difficulties faced by our longstanding partner in NSW who densified the Corflute® prior to its return for recycling, culminated in an unsustainable recycling program.

The old interstate Corflute® Recycling Program required remodelling to enable a sustainable solution for Corex, Corflute® users and environment alike.

Why this partnership is different

It was critical that we were not simply bringing back air-filled containers of Corflute® (the fluted composition of Corflute® creates more air than weight volume) as this is not environmentally friendly or cost effective.

With 50 years of recycling experience servicing commercial printers, Paper Resource had all the ingredients that we were looking for. Aside from decontaminating, densifying and bailing Corflute®, Paper Resource will offer a complete service for Corex and Megara customers. From delivering Corpaks® for Corflute® and PROMEG® polypropylene offcuts and scrap, right the way through to returning semi-trailer loads of bailed materials back to Corex Recycling.

All material returned to us from Paper Resource will have a use within Corex Plastics creating a circular economy. Trials of the new service have commenced. The next steps will include the delivery of Corpaks® and advising customers of drop-off locations.

About Corex

Established in 1985, Corex Plastics (Australia) Pty Ltd (Corex) is the exclusive manufacturer of Corflute®, a proprietary twin wall profile polypropylene sheet used broadly across the retail display and signage, packaging, material handling and building industries. Corex also extrude solid and cuspated drainage sheet and roll products.

Corex houses a specialist range of fabrication services offering a one-stop-shop to customers seeking locally made plastic solutions.

Corex products are designed to be reused again and again. When the product is ready to retire, we can collect your post-industrial waste, recycle it, and reuse it.

Corex is proudly Australian. Our products are designed for the circular economy.
