

Corpak®

Corpak® Bulk Packaging

Product overview

Corex have designed a proprietary range of intermediate bulk handling containers (IBC) called Corpak®'s. Corpak® containers are built for strength, convenience, and flexibility. Corpak®'s have endless applications including transporting:

- scrap
- cut flowers
- fresh produce
- manufactured components
- finished goods

We can customise the design with shelves and other supporting features for unique applications such as cut flower distribution.

How are Corpak®'s made?

Corpak®'s combine thermoformed HDPE pallet bases together with an interlocking foldable, durable, impact resistant Fluteboard® wrap (brandable outer sleeve).

Features & options:

- Manufactured from food-grade Australian polypropylene
- Water and mildew resistant
- Collapsible and nestable when empty
- Interlocking design enabling vertical stacking
- Four-way lift access
- UV stabilised: weather safe
- **Option:** HACCP-compliant – 'sealed edge' technology (closes flutes), makes the design suitable for clean room environments where contaminants are a concern

General sizes & materials:

- Rigid Pallet (base): 1165mm x 1165mm x 1165mm thermoformed HDPE.
- Corpak® sleeve (internal dimension): 1145mm x 1145mm x 1145mm x 8mm Corflute®. 100% recyclable polypropylene

Material colours & print options:

- Standard colours or customise to your corporate colour making your Corpak® easily identifiable.
- Screen or digitally printed

Customise this product: Our technical specialists and designers can work with you to create customised solutions including size, colour and print.

Sustainability: Corpak®'s are designed to be used again and again! But when your Corpak® is ready to retire, send it back to be recycled at our closed-loop manufacturing and recycling facility.

Corpak®

Corpaks® combine Corflute® (PP) sleeves with a thermoformed plastic pallet bases and lid.

The Corflute® sleeves can be designed either as:

1. Complete stand alone unit
2. Collapsible unit that folds down and stacks into the pallet base, thereby minimising valuable warehouse space.

The overall design of these units can be custom designed to suit your specific requirements.

Corpak® benefits:

- Packaging cost savings (based on trip returns)
- Strength and durability – up to 500kg
- Re-usability
- Stackable and collapsible
- Nestable
- Four way fork lift access
- Lightweight
- Weather safe
- Clean and washable
- Locking tabs for stability
- Food grade materials

Pallet material: HMWHDPE

Pallet Base & Lid Size: 1165mm

Pallet Sleeve Size:

Length OD: 1200mm x Width OD: 1200mm

Length ID: 1145mm x Width ID: 1145mm

Height can adjust to your requirements.
